

FEELING OVERWHELMED BY TECH STUFF?

you're *not* alone.

LET'S WALK THROUGH THIS TOGETHER

# adding your badge

Head over to the original post at <http://binduwiles.com/buddhism/my-new-project-21-5-800/> and take your pick of all the fabulous badges on offer.

When you've decided on the one you'd like, *click it*. You'll then see it displayed by itself in your browser, uncluttered and ready to roll.

*Right click* (or *CTRL + click* on a Mac) on the badge and select 'Copy Image Location'.

Open your *site admin dashboard*.

*Add a new sidebar image*. The specifics of this part will be different for each blogging platform, so you might need to consult the FAQ section of Wordpress, Blogger, Typepad or whichever system you use if you need more of a helping hand.

*Paste the copied location* of your fancy new badge into the field that asks for the image URL. Then *link the badge* back to <http://binduwiles.com/buddhism/my-new-project-21-5-800/> and hit your 'Save' option.

*Voilà! You're all set.*
